

M.S. APPLIED MATH
AND
M.S. SECONDARY EDUCATION
GRADUATE STUDENTS

The Summer 2009 Math 457 Recent Trends in Math course is a section for elementary school teachers (the MA program). It is not a section for the MS and cannot be used towards the MS degree. You can check this by reading the registration restrictions under the Math 457 entry in the Schedule of Classes.

If you are looking for an elective, Math 332 Foundations of Algebra II is offered in Summer 1A as a Saturday only class from 9 a.m. to 4:25 p.m. This may be a good option for those of you still teaching during Summer 1A or those of you who would like to keep your commuting time down.

If you are looking for a 400-level class, you may consider Math 473C Advanced Topics: Operations Research as an option it is offered from 5:40 to 8 p.m. as a Monday/Tuesday/Wednesday class. This is an MS- Applied class that I will approve as a 400-level course in the secondary track. You should contact Dr. Gidea (M-Gidea@neiu.edu) 773-442-5779 about the content of the course if you are unsure of your readiness.

Dr. Tanya Cofer
Assistant Professor of Mathematics
Advisor: MS in Mathematics (Secondary Education) NEIU
