

After-School and Saturday Workshops

The States of Matter: Why Ice Floats, Gr. 3-8 Hands-on Exploration

We are so used to seeing ice float in our drinks that we don't realize how really unusual that is! Take this opportunity to become better acquainted with the three primary states of matter and how they change. This is a very simple experiment to take back to your students. The Science of Fire workshop is a follow-on to this workshop and you are encouraged to attend both.

Wednesday, July 21, 2010
11:00am-12:00pm

Rita Meier, CTC Consultant

The Science of Fire, Gr. 3-8 Hands-on Exploration

*What three things are needed for any fire? What different ways can you use to put out a fire? With a little care, you can do these experiments with your own class. Observe how matter undergoes basic physical changes and this **all important chemical change!** Come to both 'Why Ice Floats' and 'Science of Fire' to round out your understanding of the states of matter.*

Wednesday, July 21, 2010
12:30pm-1:30pm

Rita Meier, CTC Consultant

Connecting Math and Literature, Gr. 3-8

Incorporating literature into your math activities will enable students to bring meaning to abstract concepts. Participants in this workshop will have fun doing standard-based activities which connect to stories with a math theme.

Wednesday, August 4, 2010
4:30pm-6:30pm

Sharon Rak, CTC staff

Chicago Teachers' Center
