

Northeastern Illinois University Student Center for Science Engagement

The Student Center for Science Engagement is a resource to help students succeed at NEIU and in their future careers.

We primarily serve 6 departments: Biology, Chemistry, Physics, Earth Science, Computer Science, and Mathematics.

We work with students who are majoring in, taking class in, or who are just interested in these departments.

We offer:

- One-on-One Advising – you can work with our advisors to explore majors, internships, career options or questions you might have
- Resources to help you succeed in your classes such as: tutoring and peer-led team learning (PLTL) through the departments
- Career, internship, and major exploration workshops and seminars in the natural sciences and mathematics
- Graduate school exploration and application assistance
- Research opportunities – apply what you've learned in your classes and gain hands-on experience (many are paid positions!)
- Travel to scientific conferences to present your research and meet professionals in your field
- Mentoring and networking opportunities for students interested in STEM (Science, Technology, Engineering, and Mathematics) fields

Contact the Student Center for Science Engagement
We are located in SCI-235
