PHIL 313 - Ethical theory: How is deontology different from Buddhist ethics? Can virtues become burdensome and oppressive conditions? Does luck shape morality? Can compliance with oppression ever be autonomous? Who has a duty to resist oppression, and when, if ever, is blame justified? This course examines these questions through both Anglo-European and non-Western ethical traditions, as well as feminist, anti-racist, and decolonial perspectives. We will investigate classic ethical theories and their critiques, alongside central ethical concepts such as moral luck, moral responsibility, agency, and moral repair.

Though the course will broach serious and intense topics like sexual assault, it will also ask students to reflect on sex's role in healthy relationships and a good, fulfilling life. Much of the course will be framed around issues of social power (using feminist theory, queer theory, critical race theory, etc.). Students will be asked to respectfully reflect on human difference, but also to make ethical judgements and put forward arguments for the sake of critique: noticing, questioning, and debating ideas that have real ramifications for our lives.
