## Q47 - What is the single most important experience you had at NEIU?

A&S

What is the single most important experience you had at NEIU?

Finding out WGS was an option for a major and making the switch!

Everything! I loved the professors, the library, the whole learning experience was awesome!

The research presentation for all stem students.

Academic

Finishing degree

Affordable college education - being able to complete my Bachelor's without going into debt.

Literacy improved from 2 to 10

My paperwork for financial aid getting lost by staff multiple semesters. Really taught me to pester people until their jobs got done.

Working in the writing center. I worked for two semesters as a WIP Peer Tutor and a Writing Fellowship. This experience was so rewarding. My fellow tutor offered the most open and honest exchange of ideas and opinions. We came from all different backgrounds and different majors, but we talked openly about what it meant to be a student, a peer tutor, and a mentor. We discussed everything from politics to sports, and never did we stop anyone from expressing their opinions.. It would have been wonderful if the administration and student body could have been as open and honest as we were in the writing center. Also as a WIP Tutor, I had the opportunity to work with my fellow students. I got to offer ideas and ways to improve their writing, well at the same time learning ways to improve my own writing and understanding of the world around me. The Creative Writing Center truly enriched my time at NEIU.

Being the Editor in Chief of Que Ondee Sola magazine and the President of the Union for Puerto Rican Students

Diverse student body and excellent professors within my department

The most important experience at NEIU was having professors who were very knowledgeable professors who knew what they were talking about. Professors who would not give wrong information and were not afraid to admit they did not know the answer or the correct information and made every effort to find out and get back to me with an honest answer. Also, my internship was awesome--it really prepared me for my current job.

Learning to to write essays and dissertations in proper format.

Being involved in Student Organizations

The educators and staff cared about me being successful.

The interaction with various groups of people.

Meeting professors and fellow students

---

The relationships with professors

---

Researching with Dr. Graciela Perera for the SCSE

---

Meeting people in Acting class with Professor Gallagher

---

Leadership. Opportunity to go above and beyond what's taught in the class.

---

I didn't have just one. I learned a lot and had a great time doing it. I gained amazing friendships and feel I accomplished so much in my degree in graphic design.

---

Learning, I guess.

---

The guidance I received from my professors in the Communication, Media, and Theatre degree program was exceptional. I am grateful for their open availability and willingness to help and to see their students succeed. It is because of the great experience that I had at NEIU in my classes that I decided to continue on to a Masters in Communication and now have plans to pursue a PhD in the field. Had it not been for the positive energy and teaching styles of my professors, I wouldn't have had such a great time learning. The program was easy to follow, meaning that I knew which classes I had to take to graduate, and I felt that there were no barriers and red tape like I had experienced at other universities. Class times were available that fit my schedule and sometimes I took a night class or online courses. The professors truly care and are passionate about teaching and helping their students, which made my experience very memorable. I will be forever grateful for their guidance.

---

I believe the field experience in my major of Psychology. I learned a lot of skills.

---

Building connections

---

My internship and final class that went along with it. Mr. Dragan Milovanovic was EXTREMELY helpful and really made us think outside the box.

---

meeting people I never thought I would and making life-lasting connections

---

Diversity.

---

How much investment and dedication each professor put in ensuring the success of students.

---

Right now, Dr. Snow's K-5 Elementary Music Ed class! Also, my clinical and student teaching semesters in the northwest suburbs and College of Ed classes (EDFN?) 306, 307, 309, & 311.

---

Building a positive a supportive professional relationship with my professor. This experience lead me to research inside Chicago communities and fostered informational resistance within myself. As an outreach worker, this resistance is vital to communities I serve here in Chicago, as I hold hope for others while building a larger sphere of justice to under-served populations. Northeastern was the tool necessary for my own personal development in challenging oppressive systems our communities experience as they navigate and develop social policy for essential resources needed to uplift Chicagoans. I am proud of the faculty at NEIU, particularly the history and social work departments. I am proud how our campus represents the diversity, not only seen throughout Chicago, but across America. I'm proud to be a Golden Eagle.

---

Graduation

---

Very knowledgeable professors

The professors

---

Getting my degree.

---

I enjoyed tutoring at the Center for Academic Writing. It was challenging and I made a lot of friends.

---

Being the president of URO, student organization.

---

Study abroad in Limerick, Ireland!

---

Graduation Or rallying up my classmates for grueling study sessions.

---

Internships and research

---

Connection with peers

---

Taking a class with Jon Hageman. Led me to Belize over spring break, Italy for a year of study, and changing my major on return to NEIU. Subsequent enrollment into University of Chicago scholarship program.

---

Meeting life long friends

---

Capstone project/Research Lab.

---

The ability to transfer my community college credits to obtain a bachelors degree with minimal student loan debt

---

Having a close relationship with my professors and peers. It was like a family.

---

The ability to grow professionally and academically at NEIU El Centro and Main Campus.

---

Cmt and any chicago film society events

---

Spending time with friends and building relationships

---

Establishing connections with those inside my major and within the Honors Program, since we had shared experiences.

---

Senior capstone research

---

My summer internship that I got with the help of NEIU Science Center. They helped me with all the steps.

---

Being involved in extracurricular activities

---

Participating in very stimulating discussions in Dr. Kim's lectures.

---

Guidance from my professors

---

The multiple communication classes because they are used in everyday life. Especially, conflict communication and non verbal communication

## COBM

What is the single most important experience you had at NEIU?

---

My last year at NEIU I met a particular professor who really made me believe in my abilities when I was starting to doubt myself a lot. Having a teacher like that is indescribable and I'll carry those kind thoughts with me forever.

---

The lounge in the business center really helped make connections with fellow classmates with in tha business department.

---

N/A

---

That no matter how much you wanted to quit and the teachers saw that you were trying hard in class, they would help you.

---

It really helped me discover my strengths & Weaknesses.

---

As an adult student, I felt that I was able to share some career and financial sector insights to both my classmates and professors. In the business world, sometimes there is a disconnect between what is taught and what one experiences. I hope that I was able to provide an insight, however brief, to my classmates who haven't yet experienced "the real world."

---

Developing friendships and similar interests with classmates, discovering common goals, having a professor who encouraged us to push boundaries and think outside the box (or outside of my comfort zone (Dr. Yunlu Dilek).

---

Meeting my new friends

---

Good professors

---

walking across the stage

---

Affordable yet having a great college experience. Learning new things and networking

---

The single most important experience I had at NEIU was walking across the stage and receiving my diploma for my UG after all the hard work and dedication. The blood, sweat, and tears I gave working so many odd jobs and finishing late night homework assignments was worth it completely. I have only the best things to say about NEIU.

## NDP

What is the single most important experience you had at NEIU?

graduation

The single most important experience I had at NEIU is taking Professor Roebuck's Algebra class (CCICS). I didn't like math but his methods were invigorating and the tutor he assigned was great; therefore, it was that class that helped me believe I could obtain my degree.

Working at Trio Department for the five years at Northeastern.

The graduation itself, 22 years after I first started college and after numerous delays...

Peers. Professors. Curriculum

Jen Blair was an exceptional advisor and linguistics professor Richard Hallett

Having profesors that care for my education

Attending a trip to Selma with Professor Pat Hill. It was educational and awe inspiring.

Due to all my experience and help at NEIU, TRIO was there for me and help me through all the Challenges I faced here at NEIU. I was able pass some of the toughest courses by getting the help I need and by doing that I was able to get my degree on time.

Visiting the United Nations for the Convention Against Torture (CAT) in Switzerland with Dr. Toffolo and the late Patricia Hill.

Teachers were very helpful and informative

I don't recall an specific one; although, I remember the stress free zone during finals as a nice experience.

having some of the professors encouragement and support

Finishing my degree and being able to continue and complete my education

NEIU has the best professors.

Learning about NDP, I never knew I had this option, and how to get to grad school quicker.

Inner City Studies buildingg activities

Completing the WIP class successfully!

My professors were very competent and continually challenged me to do my best. The discussions we had helped me to clarify my position on many issues. I feel I've experienced a lot of growth as a human.

## GCOE

What is the single most important experience you had at NEIU?

---

My clinicals/student teaching experience. I think every student should have to go through a internship even if it is in another field. (example: finance students should have a financial internship) It taught me a lot about myself and gave me confidence about what I was taught during my program. It also gave me something to put on my resume. It was an experience I could talk about during interviews.

---

The diversity was amazing! I loved meeting all different types of people from different ages, backgrounds, and cultures. The staff were amazing too!! I felt like they all genuinely cared about our futures.

---

The relationship that my education cohort had and the relationship with the professors.

---

Honor ceremony

---

Observing different teaching styles of teachers and their attitude

---

Education

---

There wasn't only one single most important. During my time there, the HRD professors were always challenging us and pushing us to learn from each other and not just the material. They gave us real world expectations and experiences.

---

Meeting professors who have changed my views on how I see the world.

---

Being able to work on campus and staff becoming a second family.

---

Developing my cultural club was the most important experience while at NEIU.

## GRAD

What is the single most important experience you had at NEIU?

Patience Support and Encouragement from Education faculty

Excellent linguistics professors; challenging, interesting courses

I taught college for many years but had never attended graduate school. I was impressed with the extremely high quality of the teaching. The overall experience at NEIU would be my answer, and the exposure to the graduate seminars I am sure will prove invaluable over time.

Having a cohort... having the same classmates throughout the entire time helped me to persevere

Working for the anthropology department doing research

Thesis process

Graduation

My graduation Project at NEIU

Relationships

small classes

Being able to create with Dr. Tsonchev and other undergraduate students, an electrochemical etching machine applied for the use of the Scanning Tunneling Microscope (Physical Chemistry Labs) which the future generations of students can use as a research project. (This was part of my thesis dissertation for the M.Sc. Chemistry)

no single one, all experiences were important in one way or another

Writing and completing my thesis paper.

Internship year

Working on my master's thesis was incredible. I had a great adviser and a great committee. I'm so thankful that I had the opportunity to complete a large body of work and hope to continue researching my thesis topic in the near future.

One of the single most important experiences I had at NEIU was working as an SGA Senator, as I was given an opportunity to make a positive impact with a wonder group of student leaders. In our brief time together we passed a Student Rights Bill that later was adopted into the student handbook.

Student teachinh

Academic enrichment

Gaining useful knowledge and meeting people that expanded my mind.

Getting to interact with the brilliant faculty in the linguistics department and being able to take advantage of opportunities they provided me.

Student teaching

---

Not many really. I found my classes to be uninspiring, irrelevant at times, and lacking cultural relevancy.

---

Connecting with faculty who looked like me.

---

Working one-on-one with faculty advisor in designing a research plan.

---

Administrative Internship and Mock Interviews

---

student teaching

---

Practicum/Internship

---

I was able to create a new class for NEIU while I was working as a graduate research student. I am now teaching that class.

---

I was able to take weekend classes while working a full-time job. It truly was a blessing to be able to finish my Masters program.

---

The single most important experience was working as a graduate assistant, helping students improve their academic writing.

---

The people that I got to work with while in my program.

---

Having classmates from different cultural backgrounds

## Q48 - What was the one most challenging aspect of completing your degree at NEIU?

A&S

What was the one most challenging aspect of completing your degree at NEIU?

Senioritis!

Studying alllllll the time

Dealing with highly opinionated students and teachers.

Timing

Class schedule was conflicting with my work schedule

Attending class with some professors that didn't really seem professional.

Math

It being canceled halfway through me completing it.

Financial aid and billing took a long time, so I couldn't register in time and I missed out on classes that I needed to graduate. This made it longer to graduate. My outstanding balance was paid way before registration was to begin and the hold was not lifted until after registration.

I didn't really find anything to challenging, what I did find is that NEIU is a very left wing university. There is absolutely no debate of ideas. To get out of this school you need to tow the extremely left wing agenda. NEIU is also hardly the open and welcoming university as there is a very clear dislike of older students. I myself was the victim of ageism, as I also heard from other older students I who experienced the same bias. It insulting that I have to pay to join the alumni association! Its extremely insulting that I would have to pay to join, since when I went to pick up my tickets at that awful salute to graduates, I was yelled at by an alumni employee because I didn't vote for Clinton. I would have to say the most challenging aspect of this university is the constant request for cash!!!

I had a really challenging semester in my life that caused me to fail all of my classes. I lost my financial aid but decided to push forward and finish my classes. However, I now owe a lot back and it is keeping me from getting my transcripts and may even cause me to lose my job if I am not able to pay it back by July. I struggle financially with being a mother and teacher so I'm not able to take on a second job to make an extra income.

Commuting

Juggling work, family, home, internship, and assignments.

Time management between work, class schedules, homework, personal leisure and family.

Working at an mandatory internship site without a stipend

Financing my education. Most scholarships are awarded solely to extremely high achieving students while students like myself who worked 3 jobs to pay for school suffered academically and financially.

Staying the course. Not a lot of people are?/ Were majoring in the subject I was majoring in.

---

Funding

---

capstone project and honors requirements. They were challenging in a wonderful way.

---

Cryptography Class

---

Frequently changing graduation requirements.

---

I was a mother of two little girls and working on the side and finishing school was very tough but NEIU and the Art Department teachers were very helpful and I am grateful to my teachers.

---

Working a full time job and attending school full time.

---

I had no challenges.

---

Getting proper guidance

---

Getting the classes I wanted. I was saddened that I couldn't minor in CAST due to the timing of the classes.

---

balancing time between school, multiple jobs, internships, and personal relationships

---

The course levels of your major.

---

The lack of availability of certain classes at certain semester. Also, government policies and the creation of disruption of the school year due to furloughs.

---

Completing all of the required concert attendances; I was so involved in electives and performance groups that it was hard for me to make time to attend other performances. I feel that it's ridiculous that we were not allowed to count performances that we participated in ourselves. This held me back from graduating by a semester. Dr. Owen's Vocal Method's class - which I had to repeat - (Sr. yr) was also grossly overwhelming.

---

Balancing academic workloads with work and life responsibilities. It was also difficult wondering if the college would remain open during the budget crisis. This crisis saw a vacuum of faculty leave, students felt for their professors and campus staff worrying about their jobs. On the bright side, this experience of financial instability brought a sense of togetherness, and helped to shape positive activism on campus.

---

Time

---

None

---

The lack of professionalism by some of the other students on campus. The library is used as a social setting and a place to eat.

---

Not having a hands on capstone professor. He didn't seem to care.

---

The most challenging course was my psychology lab course. This class involved combining everything I had learned into a single research project.

---

Working a full time plus a part job while attending school full time.

---

GIS course.

---

Practical exams

---

Taking coursework in the allocated time when courses weren't always offered.

---

Commuting to school with The school work load and having a internship at the same time

---

Attending constant protests/ marches/ demonstrations while struggling to finish quickly due to fear of Rauner completely depleting our University's funds causing NEIU to close losing our accredarion like Chicago State.

---

Not knowing the schools future due to budget issues

---

My capstone class was incredible my challenging in the aspect of completing my degree, but when it comes to overall challenge the biggest one was not knowing that internships were even accessible at our school. There was no news of that to me. I feel like I could have gained so much knowledge/ experience had I known that we offered that and that there was an office dedicated to connecting students with those internships.

---

Working while attending classes

---

Time management

---

My family's situation.

---

Commuting. Busses are terrible on night classes. Work with the city on making that less of a challenge. Also parking is expensive. We are already going to be in debt for the REST of our lives. Parking was an expensive hurdle.

---

Studying for exams and coursework

---

Completing the Honors Program, particularly my Honors Thesis.

---

Time management and believing in myself that could be successful.

---

The most challenging was balancing work and school but I feel like that experience helped me overall to become better at managing time.

---

Financial Aid

---

Time management.

---

Balancing work and Home life

---

Certain classes weren't available during my time.

## COBM

What was the one most challenging aspect of completing your degree at NEIU?

---

Like most students at NEIU I worked full time. Learning to balance a full time course load and work made me believe I could do anything with enough dedication.

---

Class schedules for my major had large gaps between classes, though it did force students to become more social in the business lounge.

---

Balancing work, life, and school.

---

Improving my computer skills

---

Time constraints

---

Balancing work and school. And I had it easy, in my opinion. I give my full respect and credit to those who have more life responsibilities than I do and are able to complete their studies.

---

Balancing work / school time.

---

Getting through work and classes

---

Capstone class

---

Navigating the program by myself

---

Financial problems.

---

Nothing out of the ordinary realm of working full time and going to school full time. But again I emphasize its importance to my wellbeing and it demonstrates my incredible work ethic.

## NDP

What was the one most challenging aspect of completing your degree at NEIU?

being disciplined enough to finish

The most challenging aspect of completing my degree at NEIU was making myself take classes regularly. I stopped too many times and didn't take advantage of summer classes.

Having some professors work with me because I had learning disabilities. Being respected.

Making time in my life (work, other commitments) to actually finish papers and wrap up my last couple of classes.

Completing all credits new and old.

Class timing

The writing process of research papers

Trying to balance working full-time, attending classes and completing an internship at the same time.

The most challenging was math

Being a returning student over 40, working days and going to school at night and on weekends.

The requirements for the education department were not clarified at the beginning therefore became rushed and too overwhelming at the end.

Having two jobs while completing my degree was definitely challenging.

the hard work of getting to the end

Not enough classes available

Managing school, family, and work.

Times of classes. Sometimes there were at awkward times.

Advisors at CICCS were not helpful

Working full time and attending class full time.

Balancing it with work and taking care of my family.

## GCOE

What was the one most challenging aspect of completing your degree at NEIU?

---

The most challenging was dealing with the fact that I felt I was penalized for taking my general education classes at NEIU. I had a 4.0 for my program GPA, but with my general education classes, it brought it down to 3.26. Classmates who transferred into NEIU specifically for the Elementary education program received rewards/medals/ropes for graduation for getting a 3.5 GPA just because their general education credits didn't get accounted for in their overall GPA like mine did. I worked really hard for my degree and my 4.0 major GPA and received no recognition for it.

---

I lived over 50 miles from campus, so the commute was awful, especially in the winter. But, I was really motivated to keep going and I never missed a day of class!

---

The lack of communication between advisors and departments.

---

Day classes only rather than night classes

---

Balancing classes, meeting deadlines

---

Working and going to school.

---

Working 50+ hours a week and trying to complete a degree at the same time.

---

Not being able to live the "college" life, aka. Dorm.

---

Being on probation my first year due to not seeking counseling

---

My academic advisor at the time was horrible. She provided no guidance, no assistance and she is the reason I prolonged my education.

## GRAD

What was the one most challenging aspect of completing your degree at NEIU?

Severe Life issues

having enough time for homework while working

Initially, the reading and writing workload seem almost undoable. But over time I adjusted with the assistance and counsel of several instructors.

The amount of reading and papers was challenging for someone who had been out of school for a long time.

Lack of class variation.

Time management- the offering of required classes only every other semester made coordinating class changes difficult-

Waiting for supplies and instrumentation availability

MY CS 404 SUBJECT

Expectations of completing a Master's degree while teaching full time

adequate studying time because i was working full time as a grad student

The only challenge was the economic factor such that being able to pay for my classes. But a miracle occurred and I was blessed to be given the opportunity as a Research Graduate assistant for the Physical Chemistry Lab, also became one of the Chemistry tutors (SCSE and the LSC). This enable me the opportunity to inspire the branch and tools of chemistry to all students within all majors; thus prepare the next generation of students to aid humanity.

getting myself motivated to work harder

Not having a stable income while in graduate school.

Completing internship hours

Financial aid was difficult. Master's students don't have a lot of options when it comes to financial aid before they start their education. It was hard to find ways to pay for the first few semesters. Thankfully I was offered a scholarship and a graduate assistantship which helped cover a lot of the cost.

One of the most challenging aspect of completing my degree at NEIU was balancing school, work and commitments as a student leader. While having a difficult time finding leads in the career field I wanted.

Balancing school with parenthood.

developing research skills

Working more than 40 hours a week, burned out but I still managed to graduate.

The most challenging aspect of completing my degree was stopping enrollment in linguistics classes!

## Finances

---

Showing up to classes was painful and a waste of time in most cases. I found that I graduated from my MA program without new insight or knowledge

---

The travel component--location was not ideal.

---

none.

---

The amount of course work in addition to a full time job.

---

completing a new program with an often absent advisor

---

Family health issues / life balance

---

During my MA program, my husband suffered a stroke.

---

The most challenging aspect of completing my degree at NEIU was the uncertainty of graduating.

---

It was challenging to study for my degree while working as a self-employed freelance writer.

---

Communicating with my advisor was difficult and made it hard to understand the courses that were outlined for me to take. At times I was unaware of certain requirements and luckily was able to overcome these things by taking matters into my own hands.

---

Group projects!
