

edTPA Lesson plan suggested components

SCALE does not recommend any particular lesson plan format or template. If your program decides to implement a lesson plan template, the program faculty needs to align the template with the elements of the subject specific edTPA handbook. Here is a list of some of the elements that are included in most of the handbooks (consult with your specific handbook).

1. Context of the Lesson
2. Lesson Rationales
3. Standards
4. Learning Objectives
5. Language Demands as defined in the handbook
6. Learning Assessments
7. Instructional procedures
8. Instructional Materials
9. Modifications or accommodations for students with special needs
