

Ink & Roll Fingerprinting

<https://accuratebiometrics.com/ink-and-roll>

At times, fingerprints are required to be captured using the “ink and roll” method. Industries such as banking, Out-of-State Licensing Agencies, Out-of-State Nursing and International Travel requirements are among several reasons why you may need to have your fingerprints captured using the ink and roll method.

Accurate Biometrics offers Ink Fingerprinting at all of our locations. Applicants may choose to bring a standard [FBI \(FD-258\) form available for download here](#) or these are available at all of our locations for applicants utilizing our ink and roll service. Accurate Biometrics guarantees our service. If you have an ink fingerprint rejected by the FBI, due to fingerprint technician error (i.e. images out of sequence), return to one of our locations with an Accurate Biometrics receipt (and the rejection notice), and you will be printed at no cost.

Accurate Biometrics provides ink or live scan fingerprint capture for Corporate Board members and Company owners required to submit to fingerprinting for a liquor license or general business license. Our service is professional, discreet, confidential, trusted and can be performed onsite. Call today 866-361-9944 for scheduling and pricing.
